Q1 Banking Transaction System – Exception Handling

10 marks

Develop a Java program for an ATM withdrawal system. The program accepts the account balance and withdrawal amount.

The program must:

- Accept the current account balance and withdrawal amount.
- Throw a user-defined `InsufficientBalanceException` when the withdrawal amount exceeds the balance.
- Handle withdrawal amounts that are zero or negative.
- Handle invalid numeric input using a suitable built-in exception.
- Display a meaningful transaction result.

Your Code

```

1 import java.util.*;
2 class Main{
3     public static void main(String[] args){
4         Scanner sc = new Scanner(System.in);
5         try{
6             double balance = sc.nextDouble();
7             double withdrawal = sc.nextDouble();
8
9             if(withdrawal <= 0){
10                 System.out.println("Invalid withdrawa
11             }else if(withdrawal > balance){
12                 throw new
13                 InsufficientBalanceException("Insuffici
14             }else{
15                 balance-=withdrawal;
16                 System.out.println("Withdrawal succo
17                 System.out.println("Remaining balan
18             }
19         }catch(InputMismatchException e){
20             System.out.println("Invalid numeric inp
21         }catch(InsufficientBalanceException e){
22             System.out.println(e.getMessage());
23         }finally{
24             System.out.println("Transaction complet
25         }
26     }
27 }
28 class InsufficientBalanceException extends Exception{
29     public InsufficientBalanceException(String mess
30         super(message);
31     }

```

Input

10000 3000

Output

```

Withdrawal successful :
Remaining balance :
7000.0
Transaction completed :

```

32 }
