INDUSTRY TASK 2: Online Food
Ordering and Billing System
25 marks

2/2 answered

- Develop an AWT-based graphical user interface.
- Accept Employee ID, Employee Name, Department, Designation, Basic Salary, Working Days, and Performance Rating.
- Use suitable AWT components such as Label, TextField, Choice, Checkbox/CheckboxGroup, Button, TextArea, and List.
- Calculate Gross Salary, Performance Bonus, and Net Salary using suitable business rules defined by the student.
- Display the complete employee payroll report in a List or TextArea when Generate Report is clicked.
- Use GridBagLayout or BorderLayout for arranging the interface.
- Implement button events using ActionListener.
- Provide Submit/Generate Report and Reset functionality.
- Validate important inputs such as empty fields and numeric salary values.

Industry Context: The application simulates an HR payroll module used to capture employee

information, perform basic payroll processing, and present a report for HR verification.

Expected Deliverables

☐ Java source code.

☐ Working GUI application with event handling.

☐ Sample input and output.

☐ Screenshot of the final application.

☐ Brief explanation of components, layout manager, and event handling used.

✔ Submitted Files
